

Announcing a Zoom Woodturning Demonstration by Professional Woodturner Craig Timmerman on Tuesday, April 20th, 7:00pm to 9:00pm. Everyone is Invited. #

The Independence Woodturners, the Northland Woodturners, and the Kansas City Woodturners have engaged Professional Woodturner Craig Timmerman to demonstrate turning his imaginative "Torus Vase" on Tuesday, April 20th, 7:00pm-9:00pm.. This is a Zoom demo with Craig live turning and narrating in his studio. You will be able to ask Craig questions after his demo and maybe during the demo. Craig will send out the Zoom link a week or two before the demo. We will make sure you get the link.

Craig Timmerman's demo is not free for the clubs so we request a \$10 donation to help pay for this event. To use Paypal to pay Craig's fee click on this link or paste this link into your browser:

<http://www.kcwoodturners.org/Demos/CraigTimmerman/CraigTimmerman.html>

If you don't do Paypal, you can pay with a credit card by emailing Kevin Neelley (KCWT Treasurer) to arrange for a phone call click on this link:

Kevin's email is treas@kcwoodturners.org

If you wish to mail cash or check, that's okay but email Kevin Neelley to let him know. Mail to KCWT Treasurer, 14738 W 80th St, Lenexa, KS 66215

The Independence Woodturners are hosting this event. The Northland Woodturners and the Kansas City Woodturners will each host another demonstration event this year. Don't worry if you are a member of more than one club because all proceeds go into a common pool to pay for this year's demos.

Thank you!

Craig Timmerman's Bio:

Craig Timmerman is a full-time artist and production woodturner living in Austin, TX. He is a nationally-known woodturner and gives demonstrations and woodturning instruction.

He picked up woodturning in 1998 when he took a weekend class at a local store. After that weekend the wood working equipment in his shop ceased to be used for anything except woodturning. He has now expanded into using bent lamination (the process of gluing of thin strips of wood and bending them under pressure over a form) to augment his turnings and to produce new and exciting pieces.

Craig's specialties include hollow forms, spheres, and non-round (e.g. square) turnings. Many of his pieces combine multiple turnings and bent laminations. He works primarily with reclaimed timber--trees that have come down in storms, trees being taken down for construction, and the occasional piece of firewood. Reclaimed timber is often filled with flaws of different kinds, such as cracks, bug holes, or voids. Rather than try to remove the flaws, he accentuates them by making them the focal point of the piece, filling them with crushed stone, or carving them into other shapes.

Craig is a member of the American Association of Woodturners and the Central Texas Woodturners and is a firm believer in their mission to provide education and information to those interested in woodturning. Craig frequently demonstrates and teaches his craft. He has been a featured demonstrator three times at the American Association of Woodturners National Symposium as well as multiple regional woodturning symposiums, and local woodturning clubs.
