

# Jason Clark

is coming to our Clubhouse  
at 3189 Mercier St, KCMO

on

**February 24th and 25th**  
Everybody is welcome to attend!

Jason Clark has been a woodturner since the age of 10. Now a very talented professional woodturner, he has demonstrated at many clubhouses and in many of the national woodturning shows including SOFA in Chicago and AAW Symposium.

**Saturday, February 24th, \$25.00 Demo starts at 9:00am**

Jason will start out the day with a short presentation of his work and proceed to turn a variety of off-axis and multi-axis turnings. The morning will conclude with the creation of a lidded box turned so the outside has three distinct faces that twist 120 degrees along the length of the box. The afternoon session will be focused on making Saturn bowls. Lunch is on your own.

**Sunday, February 25th, \$95.00 Hands-On starts at 9:00am**

Jason will guide the class through making two projects. Students will spend the morning making several multi-axis spindles, and ultimately a lidded box with a twist. The afternoon session will be spent with the students making an ultra-thin parting tool followed by a Saturn bowl with offset rings. Students should be somewhat experienced and comfortable turning bowls and spindles. Class size is limited to 10 students so enroll early to reserve your place. Wood and lunch are furnished.

#Both events will be held at the KC Woodworking Guild Clubhouse at 3189 Mercier KCMO.
