August 2005

LT. KELLI BAILIFF Speaker at our next meeting

Officers

President:

Jim Lambie
(913) 681-1058

Vice President:

Frank Novich
(913) 788-7109

Treasurer:

Kevin Neelley
(913) 492-6522

Secretary:

Bruce Page
(913) 859-9809

Advisors:

Russ Blaser
(913) 894-2232
Anthony Harris
(913) 648-2027

Librarians:

Dick Smith
(913) 341-4613
Pete Stiglich
(913) 342-9133

Camera:

Don Grimes
(913) 962-2060

This month's meeting will feature a community service speaker talking to us on missing children in our community. Kelli Bailiff is a member of our woodturning club.

Lt. Bailiff has been a member of the Wyandotte County Sheriff's Office for the past 10 years, although her law enforcement career began in 1982. Lt. Bailiff is the Unit Commander of the Sheriff's Office "Missing Child Unit", which has to date, been responsible for the safe recovery of 117 missing children. She also serves as the Field Supervisor and the Warrant Supervisor.

Lt. Bailiff has been named as 'Officer of the Year' 3 times and in 1998 she was honored to be the recipient of the Kansas Sheriff's and Chief's

of Police Association's Bronze Award for her dedication to the issue of child victimization.

Lt. Bailiff in 1999 received several awards for her work with missing children. Most notable were the National Missing Children's Award presented by Attorney General Janet Reno and Sony Entertainment and the 1999 Liberty Bell Award presented by the Kansas Judicial Association.

Lt. Bailiff is the host of "Child Search", a program aired weekly on KMBC-TV-9, which spotlights missing child cases. She also serves as Vice President of the National Center For Missing & Exploited Children's Kansas City Branch Advisory Board.

Woodturning - A definition

From Wikipedia, the free encyclopedia.

Woodturning is a form of woodworking, that is used to create wooden objects (e.g. a bowl or a table leg) on a lathe using cutting tools. Woodturning differs from most other forms of woodworking, in that the wood is moving while

a (relatively) stationary tool is used to cut and shape it. Many intricate shapes and designs can be made by turning wood.

There are two distinct methods of turning wood, Spindle turning and Faceplate turning. In spindle turning, the grain of the wood runs lengthwise, and the piece is typically spun on centers between the headstock of the lathe and the tailstock, with material removed from the side of the wood. In face plate turning, the grain of the wood runs perpendicular to the axis of rotation, and the piece is often attached to the lathe via a plate or a chuck. Most bowls, platters and vessels are face plate turned, while pens, table legs, and other slender pieces are typically spindle turned. Regardless of the method of attachment, the orientation of the grain determines the method in use, the type of tools to use, and the direction of cut.

Club Events

Events held in basement of McCray Lumber off I-35 on 67th Street in Merriam Kansas entrance on west side of building

August 8 - Monday Meeting Kelli Bailiff speaker

August 13 - Second Saturday

August 27 - Fourth Saturday

The AAW 2005 Symposium

By the reports I have heard and from my own experience the 2005 Symposium was a great success. That success was partially due to the support from many of you that did everything from setup to sweeping floor to running cameras. The statement below is a quote from the AAW website.

The 2005 AAW Symposium was another great conference. The 2005 Symposium set 3 new records:

- *Over 1,100 attendees overall*
- *Over 1,300 folks at the Saturday banquet*
- *\$68,000 raised for the Educational Opportunity Grants program (last year \$56,000 was raised)*

Southwest Association of Turners (SWAT)

SWAT will hold a symposium September 30 – October 2, 2005 in Wichita Falls, Texas. Three full days of demonstrations by Bonnie Klein, Malcolm Tibbets, Mark Sfirri, and Alan Lacer are available. Woodturning vendors and an Instant Gallery displaying turnings by many artists are featured. More information is available on the SWAT website www.swaturners.com.

Craft Supply Order

See Kevin Neeley at the
Monday meeting for Details

Safety

When woodturning, it is important to consider personal safety.

Loose clothing should not be worn, all jewelry should be removed, and long hair should be tied back.

* Eye protection is a necessity when woodturning.

* Respiratory Equipment is also important when woodturning or doing any type of woodworking that creates dust.

(More about wood allergies in a future newsletter)

* Ear Protection Compared to other power tools, a lathe is a relatively quiet machine. Ear protection should be used if motor noise is excessive, a shop dust collector is running, or the combination of wood and tool used produces undesirable noise.

* Foot Protection. Protective footwear is a must for any type of shop activity.

Rocky Mountain Wood Turning Symposium

September 17 - 18

Loveland Colorado

\$130 single - \$200 couple
