Woodturners

October's Auction a Big Success

"Don't loose out for one dollar. Thanks for you help. SOLD!" Once again Eddie Powers called the KCWT Annual Auction.

The bidders gathered early and stayed until the last call of sold. Buying almost everything donated to the auction. Great bargins, both new and used were there for the taking. Lathes, hand & power tools, DVDs,

wood, sandpaper and finished works of art, were just a small sampling of the items up for sale. Donated items from individuals and companies, sold during the evening bidding. After 2 1/2 hours of bidding and

when all was said and done the club raised \$4995.00 from the evening's activities. A big thanks goes to the Auction Committee for all the hard work that they did in preparing for the evening. From asking for donations, and writing Thank-Yous. to organizing the sale. The club thanks Howard Russell, Keith Arnold, Walt Johnson Mike Erickson, & Frank Hoog and all the others that helped with the event. All your efforts are what made it such a success. And to our auctioneer Eddie Powers, A job well done.

Scout Troop 136 Learn to Turn

Lenexa, KS Troop 136 will be visiting the KCWT's facilities on November 14th to learn about turning wood. The scouts will be receiving safety instructions and then creating their own turned pen. We are needing people interested in helping the scout learn to turn. If you are interested in helping them turn or sharing you knowledge on woodturning please join us on Saturday. Part of our mission as the KCWT is to support interested youth, providing the encouragement and access to training.

Woodturning with Lyle Jamieson

The Kansas City Woodturners Club hosted Lyle Jamieson on October 10th – 12th. On Saturday, Lyle demonstrated bowl turning and using his boring system on a create a hollow form, both were a preview of the techniques to be taught the following two days of hands-on turning sessions.

Sunday the hands on class taught techniques of using the 5/8" bowl gouge with modified swept back grind. The bowl turning format taught us effortless control of rough cuts, push cuts, pull cuts, shear cuts and scraping, all used to create a bowl. The class learned how center a piece of wood to create visually good looking

bowl. How to use the different cuts properly to eliminate catches for no fear turning.

The Monday session explored the dynamics of hollow form turning. Using the Jamieson Boring System and laser light measuring devise. They learn to turn hollow forms with fingertip control

and no stress. The class instructions included set-up of the captured boring bar and boring bar usage techniques. Chucking procedures, 90 degree rule application, and hollowing techniques were also covered, along with the laser measuring system set up, laser usage techniques and the laser template guide .
